

## Exceed Corporate and Regulatory Compliance Mandates with Nexsure Enhanced Security

**Do you have regulatory or corporate compliance requirements for higher levels of security? Are you looking to further protect your organization's brand and reputation?**

XDimensional Technologies (XDTI) has always had a commitment to security that has been of paramount importance, and the Nexsure Insurance Platform has been a marketplace leader in this area with Multi-Factor Authentication and more built into our platform. Nexsure Enhanced Security (NES) takes this to an even higher level by offering additional security features that are geared for organizations whose corporate or regulatory compliance guidelines mandate more stringent requirements.

### Security Features & Monitoring

When you subscribe to NES, you can take advantage of a suite of additional Nexsure services, such as Database Encryption, Email Encryption (when using Nexsure Authenticated Email), IP Filtering, as well as the provision of additional Accounting

Controls, all designed to strengthen and protect your organization against cyber threats. NES includes a home page security analysis dashboard that shows login and system access trends.

### Access to Annual SOC 1 Audit Report

In our increasingly connected world, customers can be confident in the security of our platform and the information stored therein. XDTI performs ongoing security audits of the service environment and internal controls utilized in support of the Nexsure Insurance Platform (performed by an independent third-party auditing firm). By subscribing to NES, your organization will have access to review our SOC 1 Type 2 Audit Report, issued on an annual basis by our auditing firm.

*NES is offered as an optional add-on subscription to the Nexsure Insurance Platform.*

## Nexsure Enhanced Security Includes the Following Benefits

- + Database Encryption
- + Email Encryption (requires Nexsure Authenticated Email & supported email service, e.g., Office365)
- + IP Filtering
